**FUND STRATEGY**

The Investment manager employs an asset allocation model that broadly diversifies the fund. Each asset class is ranked and receives an allocation according to the Investment Manager's methodology. Furthermore, the Investment Manager follows a proprietary momentum system to determine whether the fund should be fully, partially or not invested in the equity market at all.

**STRATEGY PERFORMANCE**

Prior to the inception date of the Gateway Global Defensive Equity fund (CIT), the investment manager maintained an investment strategy which is used in the CIT. The Gateway Global Defensive Equity fund and the strategy performance represent separate products that employ the same strategy. The strategy performance is primarily shown to give potential investors additional information on how the strategy employed by the CIT has performed over a longer time horizon. The strategy performance and the CIT performance may differ materially due to fees, participant and portfolio transactions and other factors. The strategy performance does not necessarily represent what investor returns would have been in the Gateway Global Defensive Equity fund. The strategy performance shown at the right is from January 1, 2001 to December 31, 2019.
