Investment Products: Not FDIC Insured • No Bank Guarantee • May Lose Value

This document discloses information pertaining to the intellicents Collective Investment Trust (the "Trust"). The Trust consists of collective investment funds (individually a "Fund and collectively the "Funds"). These investment options are provided to you by your employer through the company's retirement plan by Alta Trust Company ("Alta Trust"). It is important that you review this information prior to investing.

COLLECTIVE INVESTMENT FUNDS FOR EMPLOYEE BENEFIT PLANS

What are the intellicents Collective Investment Funds?

The Funds are maintained by Alta Trust and are designed to serve the investment needs of tax-qualified employer sponsored retirement plans. The Funds are not mutual funds registered under the Investment Company Act of 1940 ("1940 Act"), as amended, or other applicable law, and unit holders are not entitled to the protections of the 1940 Act. The regulations applicable to a collective investment fund are different from those applicable to a mutual fund. The Funds' units are not securities registered under the Securities Act of 1933, as amended, or applicable securities laws of any state or other jurisdiction. In addition, the Funds' units are not publicly traded on any exchange or over-the-counter market and, as a result, the unit values are not available for publication in newspapers.

The unit values of each Fund will fluctuate and the value of each Fund will decrease or increase in accordance with market conditions. There is no guarantee that a Fund will achieve its investment objectives. Units in the Funds are not deposits or obligations of, or endorsed or guaranteed by, Alta Trust or its affiliates, and the units are not insured by the Federal Deposit Insurance Corporation or any other independent organization. The Funds are also subject to investment risks, including possible loss of the principal amount invested.

Fund Trustee

Alta Trust is a South Dakota state chartered trust company that provides retirement plan services to plan sponsors throughout the USA. In its capacity as Trustee, Alta Trust provides investment management, trust and custody services for the Funds.

Investment Manager

intellicents investment solutions, inc. is the "Investment Manager" as that term is defined in Section 3(38) of Employee Retirement Income Security Act of 1974 ("ERISA"), as amended, with respect to the Trust and any Plan investing in the Funds. All of the assets of the Funds will be invested according to corresponding strategies and investment guidelines described below.

Who May Want to Invest

The Funds may be an appropriate investment for investors seeking professional management of their retirement account assets.

About Risk

The Funds invest in mutual funds, collective investment funds (CIFs), and exchange traded funds (ETFs). The Funds are subject to market risk, meaning that the value of the investments in the Funds may decline over time, causing a reduction in the value of the Funds.

Principal Investment Risks: As with all investment strategies, there is the risk that you could lose money through your investment in the Funds. Many factors affect a Fund's net asset value and performance. The following risks may apply to the Funds' investments.

Management and Strategy Risk: The value of your investment depends on the judgment of the Funds' Investment Manager about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Investment strategies employed by the Funds' advisor in selecting investments for the Funds may not result in an increase in the value of your investment or in overall performance equal to other investments.

Objective Risk: There is no guarantee that a Fund will reach its stated objective.

Investment Style Risk: There is the chance that returns from micro to large-capitalization stocks will trail returns from the overall stock market.

Limited History of Operations: The intellicents Collective Investment Trust and its associated Funds are a new offering and there is a limited history of operations for investors to evaluate.

Expense Risk: Prior to making an investment in a Fund, investors should carefully consider the expenses and how those expenses may reduce overall investment performance.

Market Risk: The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions, throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

IMPORTANT INFORMATION

Fund of fund Risk: Mutual Funds, Exchange Traded Products (ETPs), Collective Investment Trusts (CITs), and other fund offerings may be subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in a Fund may materially be higher than a similar Fund that invests direct in securities. Mutual Funds, ETPs, CITs, and other fund offerings are subject to specific risks, depending on the nature of the fund. These risks include but are not limited to market risk, liquidity risk, management risk, credit risk, concentration risk, inflation risk, security type risk, and horizon risk.

Mutual Fund Risk: Mutual Funds are subject to investment advisory and other expenses, which will be indirectly paid by a Fund. As a result, the cost of investing in a Fund will be higher than the cost of investing directly in a mutual fund and may be higher than other mutual funds that invest directly in stocks. Mutual Funds are subject to specific risks, depending on the nature of the fund.

Exchange Traded Funds (ETFs) Risk: ETFs are subject to investment advisory and other expenses, which will be indirectly paid by each Fund. As a result, the cost of investing in a Fund will be higher than the cost of investing directly in an ETF and may be higher than other mutual funds that invest directly in stocks. ETFs are subject to specific risks, depending on the nature of the Fund.

Foreign Investment Risk: The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. In addition, changes in exchange rates and interest rates may adversely affect the values of a Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms.

Other Risks: This list of risks is not comprehensive and the Funds may be subject to other risks not specified in this Investor Disclosure.

In addition to the Trustee fee listed above in the Fees table, Alta Trust may receive compensation on the spread of the Alta Trust STIF (STIF) and securities lending as outlined in the Declaration of Trust and Participation Agreement. The STIF is an account maintained by Alta Trust. It is not a registered security or mutual fund and is not an account that is FDIC insured. As described in the Declaration of Trust, the STIF will pay a specified crediting rate to the CIT(s). That rate will be established from time to time by Alta Trust, based on the return on the investment of assets held in the STIF. The STIF does not have any separately stated fees. However, as indicated in the Declaration of Trust, Alta Trust will retain as compensation the difference between the crediting rate and the return on the STIF's invested assets (referred to as the "spread").
