**COLLECTIVE INVESTMENT FUNDS FOR EMPLOYEE BENEFIT PLANS**

***What are the Granite Group Collective Investment Funds?***

The Funds are maintained by Alta Trust and are designed to serve the investment needs of tax-qualified employer sponsored retirement plans. The Funds are not mutual funds registered under the Investment Company Act of 1940 ("1940 Act"), as amended, or other applicable law, and unit holders are not entitled to the protections of the 1940 Act. The regulations applicable to a collective investment fund are different from those applicable to a mutual fund. The Funds' units are not securities registered under the Securities Act of 1933, as amended, or applicable securities laws of any state or other jurisdiction. In addition, the Funds' units are not publicly traded on any exchange or over-the-counter market and, as a result, the unit values are not available for publication in the newspapers.

The unit values of each Fund will fluctuate, and the value of each Fund will decrease or increase in response to changes and developments in market conditions. There is no guarantee that a Fund will achieve its investment objectives. Units in the Funds are not deposits or obligations of, or endorsed or guaranteed by, Alta Trust or its affiliates, and the units are not insured by the Federal Deposit Insurance Corporation or any other independent organization. The Funds are subject to investment risks, including possible loss of the principal amount invested.

***Fund Trustee***

Alta Trust is a South Dakota state chartered trust company that provides retirement plan services to plan sponsors throughout the USA. In its capacity as Trustee, Alta Trust provides investment management, trust and custody services for the Funds.

***Investment Manager***

Granite Group Advisors is the "Investment Manager" as that term is defined in Section 3(38) of Employee Retirement Income Security Act of 1974 ("ERISA"), as amended, with respect to the Trust and any Plan investing in the Funds. The assets of each of the Funds will be invested according to the strategies and investment guidelines described below.

***Who May Want to Invest?***

Investors seeking professional management of their retirement account assets should evaluate each of the Funds to determine which, if any, of the Funds are an appropriate investment.

***About Risk***

The Funds invest in Mutual Funds, Collective Investment Funds, ETFs, and Cash Equivalents. The Funds are subject to market risk, meaning that the value of the investments in the Funds may fluctuate and may decline in response to economic, business and other market factors. Your investment in any of the Funds may decrease in value.

Principal Investment Risks: As with all investment strategies, there is the risk that you could lose money by investing in the Funds. Many factors affect a Fund's net asset value and performance. The following risks, among others, may apply to the Funds' investments.

Management and Strategy Risk: The value of your investment depends on the judgment of the Fund's Investment Manager about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Investment strategies employed by the Funds' Investment Manager in selecting investments for the Funds may not result in an increase in the value of your investment or in overall performance equal to other investments.

Objective Risk: There is no guarantee that a Fund will achieve its stated objective.

Investment Style Risk: There is the chance that returns from any group of securities (i.e., micro to large-capitalization stocks) will underperform relative to the overall market.

Limited History of Operations: The Granite Group Collective Investment Trust and its associated Funds are a new offering and there is a limited history of operations for investors to evaluate.

Expense Risk: Prior to making an investment in a Fund, investors should carefully consider the expenses and how those expenses may reduce overall investment performance.

Market Risk: The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions, throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally.
