

FUND OBJECTIVE

The fund may be appropriate for investors that would like to align their investments with their faith and Biblical beliefs and are retiring on or near the year 2040.

FUND STRATEGY

The fund strategy employs a multi-step process to establish the investments within the fund portfolio. The Investment Manager utilizes a faith-based screening system in order to meet their faith-based standards. Additionally, the manager considers numerous factors when screening companies including: current and future dividend yield, dividend increases, the company's current and future outlook, current and future fundamentals, product lineup, company revenue, geopolitical news and technical analysis. The majority of these companies are ranked by technical analysis, such as relative strength and investments are made in those that exhibit positive or improving technical analysis. Positions may be bought and sold to take advantage of short-term trends or events. This model is generally intended for investors expecting to retire around the year 2040 (target retirement date) as the asset allocation will change over time.
