Principal Investment Risks: As with all investment strategies, there is the risk that you could lose money through your investment in the Fund. Many factors affect a Fund's net asset value and performance. The following risks may apply to the Fund's investments.

Management and Strategy Risk: Each Fund has a particular strategy employed by the Investment Manager. The Fund(s) may underperform relative to its peers due to strategy specific risks or management decision risk for a given time period.

Market Risk: The market price of a security or instrument may appreciate or depreciate, sometimes rapidly or unpredictably, due to global market conditions that are not specifically related to a particular company, including but not limited to real or perceived adverse economic or political conditions changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter term and higher rated securities.

Mortgage-backed Securities Risk: Mortgage-backed securities represent interests in “pools” of mortgages. Mortgage-backed securities are subject to “prepayment risk” (the risk that borrowers will repay a loan more quickly in periods of falling interest rates) and “extension risk” (the risk that borrowers will repay a loan more slowly in periods of rising interest rates). If a Fund invests in mortgage-backed securities that are subordinated to other interests in the same pool, the Fund may only receive payments after the pool’s obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the assets held by a pool may limit substantially the pool’s ability to make payments of principal or interest to the Fund, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so-called “subprime” mortgages.
