

FUND OBJECTIVE

The Fund may be appropriate for investors who seek to maximize risk-adjusted returns by combining the long-term capital appreciation potential of stocks with the lower volatility and capital preservation features of covered call option writing.

FUND STRATEGY

The foundation of the Fund's strategy is a portfolio of carefully selected large-cap equities. The Investment Manager's security selection process emphasizes fundamental quality, strong profitability, low debt levels and proven management. The Investment Manager will write covered call options against the selected securities. Calls will generally be written on between 25% to 75% of the total value of the portfolio. This strategy reduces the upside potential of the Fund in strong bull markets but provides immediate income and lowers portfolio volatility. In addition, the Investment Manager may employ the use of S&P 500 put options to minimize downside risk in its discretion.
