

# Vest Conservative Buffer 20 Fund Class 4

CUSIP 14988C142

First Quarter | 3.31.2024

## FUND OBJECTIVE

The Fund seeks to provide capital appreciation that matches the price returns of the S&P500 Index ("Index") up to a predetermined upside cap (before fees and expenses) while providing a conservative level of buffer against Index price return losses of between 0% and -20% (before fees and expenses) over an approximate period of six months.

## FUND STRATEGY

Under normal market conditions, the Fund will invest substantially all of its assets in Flexible EXchange Options ("FLEX Options") that reference the price performance of the S&P500 Index (the "Index"). FLEX Options are customized equity or index option contracts that trade on an exchange but provide investors with the ability to customize key contract terms like exercise prices, styles and expiration dates.

The Fund uses FLEX Options to employ a "target outcome strategy" over an approximate period of six months (the "Target Outcome Period"). Target outcome strategies seek to produce pre-determined investment outcomes based upon the performance of an underlying security or index. The pre-determined outcomes sought by the Fund, which include a buffer against price return losses between 0% and -20% (before fees and expenses) of the Index and a cap determined at the start of a Target Outcome Period. In general, the target outcomes the Fund seeks for investors that hold Fund shares for an entire Target Outcome Period are as follows, though there can be no guarantee these results will be achieved:

### UPSIDE

#### If the Index appreciates over the Target Outcome Period:

The combination of FLEX Options held by the Fund provides upside participation that is intended to match the price returns of the Index, up to a cap that is determined at the start of the Target Outcome Period. The cap is before fees and expenses.

### PROTECTED DOWNSIDE

#### If the Index decreases over the Target Outcome Period:

The combination of FLEX Options held by the Fund seeks to provide protection from the first 20% of losses from drop in price of the Index, prior to taking into account the Fund's fees and expenses.

### DOWNSIDE

#### If the Index has decreased in price by more than 20% over the Target Outcome Period:

The combination of FLEX Options held by the Fund provide a payoff at expiration that is 20% less than the percentage decrease in the price of the Index with a maximum loss of approximately 80% over the Target Outcome Period before fees and expenses. This is referred to as the "conservative buffer."

## FUND PERFORMANCE NUMBERS

INCEPTION DATE 07.12.2022

Fund	Year To Date	1 Month	3 Month	1 Year	3 Year	5 Year	10 Year	Since Inception
Vest Conservative Buffer 20 Fund Cl 4*	2.98%	0.61%	2.98%	13.07%	n/a	n/a	n/a	11.02%
