

# WealthPath Smart Risk Conservative Class 1

CUSIP 94700T805

First Quarter | 3.31.2024

## FUND OBJECTIVE

The WealthPath Smart Risk Conservative CIF may be appropriate for investors with a shorter-term investment horizon or who have a low risk tolerance and are willing to accept limited growth potential to focus more on investment stability and some level of capital preservation.

## FUND STRATEGY

The WealthPath Smart Risk Conservative CIF targets allocations of approximately 21-30% in US equities, 0-9% in foreign equities, 40% in bonds, and 30% in cash-like holdings. The US equity portion of the CIF is managed using a proprietary quantitative methodology that identifies what the Investment Manager believes to be the strongest sector (growth or value) in each of the 3 US equity size categories (large/mid/small cap), and tilts the portfolio toward those areas of the market. The CIF invests predominantly using low-cost, diversified, index mutual funds and ETFs. The Investment Manager may, in its discretion, move up to 20% of the CIF's equity allocation into more conservative investments, such as bonds, if market valuations or other risk metrics warrant such a move.

## RISK PROFILE

A conservative investor who seeks to invest in fixed income with the goal of reducing overall risk and achieving current income with minimal risk to principal, short to mid-term time horizon.
