Fund Strategy

During normal market conditions, the Mid Cap Growth CIT seeks to achieve its objective by investing at least 80% of its net assets in the equity securities of mid-capitalization companies, which are defined as having market capitalizations greater than \$1 billion and equal to or less than the largest company in the Russell Midcap Growth Index during the most recent 12-month period at the time of the initial purchase. The fund will invest primarily in the equity securities of companies that the portfolio managers believe have the potential for above-average earnings or sales growth, reasonable valuations and acceptable debt levels. While the fund portfolio will generally not emphasize investment in any particular investment sector or industry, the fund may invest a significant portion of its assets in the securities of companies in the information technology sector at any given time. The fund will generally sell when the stock has met the portfolio managers' target price, the investment is no longer valid, it is believed that a better investment opportunity has arisen or if the investment reaches a value of more than 5% of the fund's net assets. At times, the fund may hold securities of small-capitalization companies.
