Lafayette Advisors Credit Select
Risk Managed Fund Class C

CUSIP 505873307

Second Quarter | 6.30.2024

FUND OBJECTIVE

The investment objective of the Lafayette Advisors Credit Select Risk Managed fund is to reduce overall portfolio volatility and drawdown while providing attractive risk-adjusted returns over a full market cycle.

FUND STRATEGY

The Lafayette Advisors Credit Select Risk Managed fund is a credit rotation strategy that trend follows a custom non-public index created and managed by WSTAM. The rules based investment model allows for a prudent exit plan when return opportunities begin to diminish in an attempt to insulate capital from external market forces such as volatile credit markets and rising interest rates. The sensitivity of the trend is adjusted based on the spread between high yield bonds and U.S. Treasuries.

The Investment Model employs a systematic process using quantitative analysis of the high-yield and investment grade market space to choose from a variety of fixed income asset classes that offer an attractive risk/reward portfolio. The rules based model defaults to the High Yield asset class unless the model has issued a sell signal allocating funds to Investment Grade fixed income.

Fixed Income Investments of the Strategy may include ETFs or baskets of fixed income securities such as high yield bonds, intermediate U.S. Government securities, short-term treasuries.

Under normal market conditions, the Strategy will invest at least 80% of the value of its net assets in high yield bonds.
